

Peter B. Giblett

MBCS, CITP, LLB

Peter handled our large projects and demonstrated excellent Project Management, Quality Assurance, communications, and planning skills plus a 'can do' approach

Adrian Owen, VP

Peter demonstrated excellent skills for understanding complex business transformation requirements and translating them into workable solutions

Soufyan Lemniai, Client Manager

[Perspe-ktiv] – A particular way of regarding something.

Summary

A Senior Information Technology Executive showcasing more than twenty years experience managing successful business results seeking a CIO/VP role.

How:

- ✓ Achieved \$400,000 for The News Group savings by re-negotiating proposed implementation approach for Lawson Financials Project, including licensing and consulting costs. Additional savings of \$200,000 on consultancy expenditures made during project.
- ✓ Identified strategies that allowed the BBC to realise an additional \$5 (£2.3) billion in additional licence revenue, this secured the FM contract (worth \$1 billion) for an additional 10 years.
- ✓ Turned around a failing project circumventing potential penalties of over \$2 million per day, by leading two parallel projects.

Career Driver

As an IT Visionary inspiring and leading teams to contribute to improving business performance through appropriate use of technology.

Special Skills

My career experience has honed the following business know-how:

- Corporate business risk – Holds a law degree augmented by experience in managing exposure, including Basel II.
- Statutory compliance management (including IFRS, SOX and Privacy law compliance).
- Delivering work programs to tight timescales and within budget.
- Optimising people and budgets to meet objectives.

Employment History

THE NEWS GROUP, BURLINGTON, ON

(2006 – 2007)

Head of Development: Information Services

Managed corporate IT development across North America. Created internally marketed and implemented strategies and business plans, enabling the execution of company's objectives.

Proposed and implemented major change to the application landscape:

- Email domain consolidation.
- Managed implementation of Microsoft CRM to provide centralized Customer Services facility
- Implemented new Financials system: Lawson.
- Managed a major database update for the Legacy system, upgrading from an old Sybase version to SQL Server 2005.
- Implemented an Enterprise Data Warehouse providing a central point for Business Intelligence for the first time in the company's history.
